# Financial Results for First Two Quarters (Interim) of Fiscal 2025, ending March 31, 2025

**November 7, 2024** 

Rinnai Corporation

### Disclaimer

Forecasts, projections, strategies, and other forward-looking statements contained in this document are based on information currently available to the Company and certain assumptions that the Company believes are reasonable. Actual results may differ materially from these statements due to various risks and uncertainties. This material is for informational purposes only and is not intended as a solicitation to trade.

1. Results of First Two Quarters (Interim) of Fiscal 2025/ Fiscal 2025 Performance Forecasts

2. Business Outlook

# Fiscal 2025 (First Two Quarters/ Interim): Consolidated Performance Overview

■ Significant improvement in results due to ongoing recovery in market conditions since previous year despite rising costs

Net sales: ¥212.1 billion (up 10.1% year on year)

Record-high level

Maintained strong momentum from 1Q to post record-high net sales despite difficult market conditions

Record-high level

**Operating income: ¥20.9 billion** (up 107.5% year on year; Operating income to net sales ratio:9.9%] Price revisions and cost reductions to combat amid rising raw material and energy costs led to record-high operating income

Record-high level

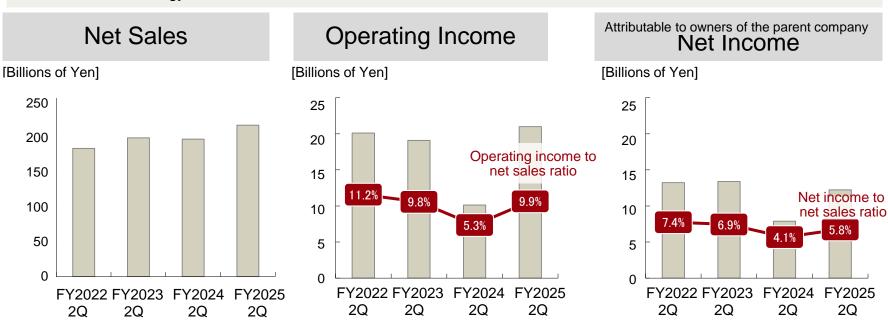

**Ordinary income: ¥22.3 billion** (up 49.7% year on year; Ordinary income to net sales ratio: 10.5%) Record-high, foreign exchange loss offset by increased operating income

Net income attributable to owners of the parent company: ¥12.2 billion

(up 55.0% year on year; Net income to net sales ratio: 5.8%)

# Fiscal 2025 (First Two Quarters/ Interim): Consolidated Financial Results

- Record-high net sales thanks to price revisions and exchange rate fluctuations despite differing levels of recovery in housing markets according to country
- Increase in operating income as production cutbacks from previous year returned to normal despite soaring raw material and energy costs

# Fiscal 2025 (First Two Quarters/ Interim): Net Sales by Product

# Fiscal 2025 (First Two Quarters/ Interim): Consolidated Operating Income Analysis

■ Significant increase in operating income due to growth in sales of high-value-added products and cost reduction effects

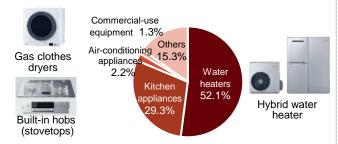

## Japan Fiscal 2025 (First Two Quarters/Interim) Results

### Segment companies

Rinnai (non-consolidated basis), domestic consolidated subsidiaries (manufacture and sales of products)

■ Net sales by product, Fiscal 2025 (2Q) results

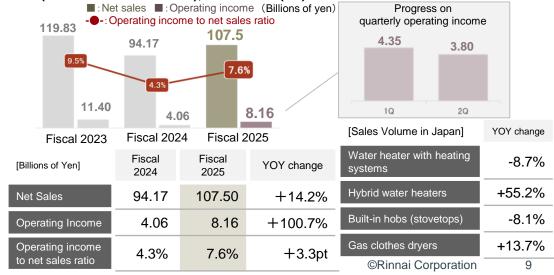

### ■ Segment results

| [Billions of Yen]                   | Fiscal 2024 | Fiscal 2025 | YOY<br>change |
|-------------------------------------|-------------|-------------|---------------|
| Net Sales                           | 86.67       | 91.18       | +5.2%         |
| Operating Income                    | 4.60        | 9.48        | +105.7%       |
| Operating income to net sales ratio | 5.3%        | 10.4%       | +5.1pt        |

### ■ Non-consolidated results of major company Rinnai (non-consolidated basis)

- Recovery in market conditions in tandem with real demand despite sluggish consumption due to rising prices
- Significant growth in sales of highly distinctive hybrid water heaters (up more than 50% year on year) supported by government subsidies
- Operating income growth driven by increased production utilization ratio amid rising raw material and energy costs

Rinnai (non-consolidated basis), Fiscal 2025 (2Q) Results

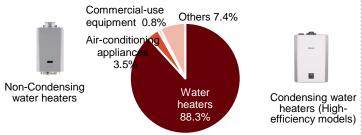

### United States Fiscal 2025 (First Two Quarters/ Interim) Results

### Two-Quarter (Interim) Results and Forecasts for 3Q Onward

■ Full-year forecasts remain unchanged in light of expected risks from 3Q onward despite strong interim results

|                      | Two-quarter (interim) results  | Forecasts for 3Q onward   |
|----------------------|--|---|
| Japan                | Strong growth in sales of hybrid water heaters driven by normalized business conditions linked to real demand, as well as subsidies, despite sluggish  | <ul> <li>Expecting continued growth in sales of highly distinctive products that address social issues/needs</li> <li>Will closely monitor raw material and energy prices while continuing to reduce costs</li> </ul>                     |
| United<br>States     | Recovery in sales of water heater sales driven by launch of new condensing units     Increase in operating income thanks to higher revenue and operational efficiency despite making aggressive promotional expenditures   | <ul> <li>Hope for recovery in new and pre-owned housing markets due to interest rate cuts</li> <li>Up from initial plan due to continuing positive impact of new products</li> </ul>  |
| China                | Economic stagnation signaling potential increase in distribution inventories     Deterioration in product mix despite steady unit sales  | - Weak consumer confidence expected to continue due to<br>stagnant economic activities - Focusing on securing profits amid cooling market conditions  |
| Other main countries | Australia: Recovery supported by severe winter despite harsh market conditions  South Korea: Increased sales and income thanks to withdrawal of competitors from kitchen appliance market, allowing us to capture distribution channel  Indonesia: Maintained high profit thanks to ongoing prices revisions | Australia: Acquisition of PV sales company expected to generate synergies South Korea: Aiming for turnaround in tough market through launch of new boilers Indonesia: Anticipate continued profit growth due to stable replacement demand |

Potential risks

Soaring prices of raw materials (steel, copper, etc.) and energy, slow recovery of consumption due to high prices and interest rates, prolonged slowdown of Chinese business, etc.

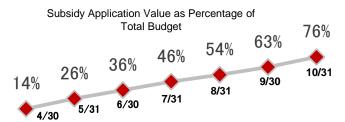

1. Results of First Two Quarters (Interim ) of Fiscal 2025/ Fiscal 2025 Performance Forecasts

2. Business Outlook

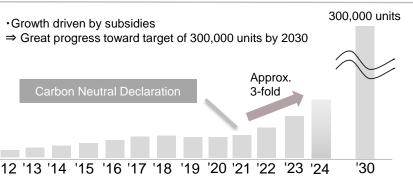

## Japan ~ ECO ONE Hybrid Water Heaters~

■ Subsidies for high-efficiency water heaters (including ECO ONE) (Water Heating Energy Efficiency 2024 Project)

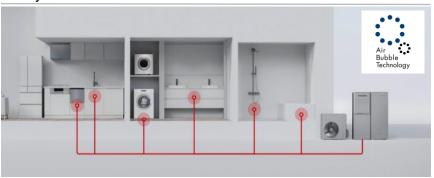

· Total budget: ¥58 billion \* Of this amount, ¥4.5 billion will be used to subsidize removal of electric water heaters and electric thermal storage heaters

### ■ Hybrid water heater sales: Results (image) and targets

### ■ Hybrid water heater with Ultra Fine Bubbles

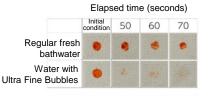

Decrease in residual drainpipe grime

bathwater

Water with Ultra Fine Bubbles

Decrease in pink-stain bacteria

## Japan ~ ECO ONE Hybrid Water Heaters~

### ■ Importance of Demand–Response (DR)

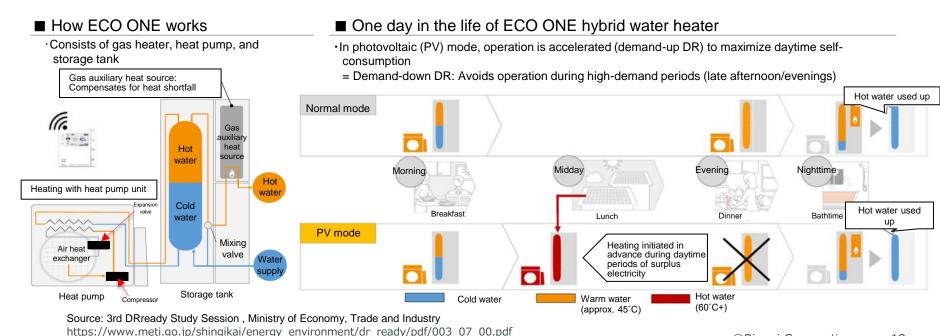

- ·To ensure stable electricity supply, the amount of electricity produced (supply) and the amount consumed (demand) must align at the same time. This requires power companies to adjust their power generation accordingly.
- •The increasing share of renewable energy, which fluctuates due to weather and other factors, raises the likelihood of electricity supply-demand imbalances.
- ⇒ The importance of Demand–Response (DR)—where energy-consuming devices intelligently adjust their usage based on the supply situation—is increasing

#### Overview of energy demand and supply DR types Demand and supply of electricity Demand-up DR Demand-up DR (when demand exceeds supply) (increases Activating DR can lead to an increase in demand) electricity demand. For example, excess Demand (kW) Ability of power Weights used are output from renewable energy sources can companies to deliver single-use only be absorbed by operating demand-side Demand-down electricity equipment or charging storage batteries. Demand DR (decreases demand) in normal Demand-down DR times Activating DR can lead to a decrease in electricity demand. During peak demand periods, for example, the output of demandside equipment can be lowered to achieve Major blackout possible supply— demand balance is a supply-demand balance. 0.00 6:00 12:00 18:00 24:00 broken

## Japan ~ ECO ONE Hybrid Water Heaters~

- Combining the strengths of gas and electricity with a storage tank achieves industry-leading thermal efficiency.
- Implementing both demand-up and demand-down responses allows flexible DR without impacting user convenience.

# United States ~New Condensing Water Heaters~

- Continued positive impact of new product launches due to aggressive sales promotions, raising the ratio of condensing water heaters
- Features of new condensing water heaters

Benefits for consumers

Realizes industry's highest thermal efficiency

95% (conventional units)  $\Rightarrow$  98%

Benefits for builders/ installers

Changeable gas type/ indooroutdoor installation options ⇒ Reduced number of models

Bluetooth® connectivity and dedicated smartphone app reduce setup time

### ■ Sales policies/strategies

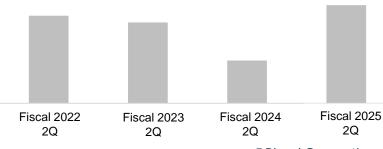

Exhibition

Installation training

Demonstration truck

<Condensing Water Heater Sales Volume>

Ratio of condensing units +5.5 points (VS Fiscal 2022, 2Q)

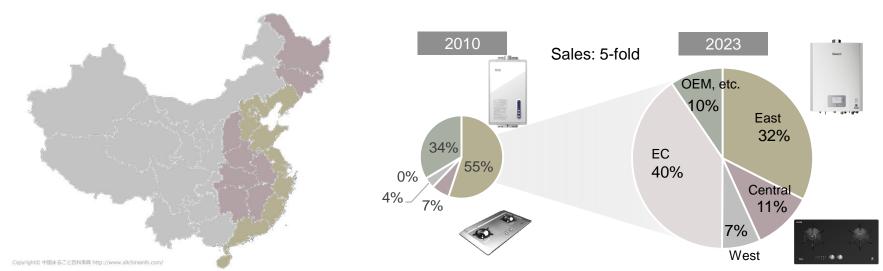

# China ~Sales by Geographic Region~

- Expanding geographical coverage due to sales channel reform
- Aim to improve production efficiency and reduce product costs to secure profitability

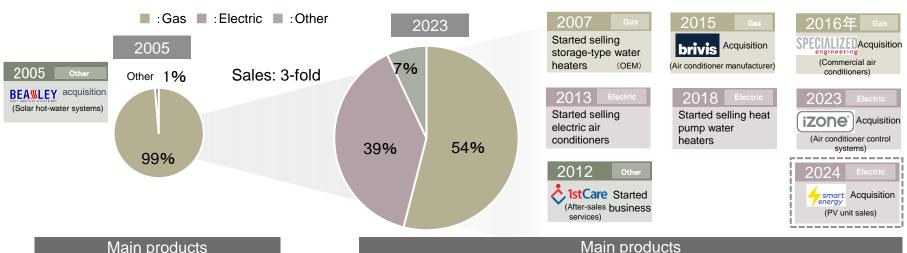

### ■ Sales by geographic region

■ : East (8 provinces, 2 cities) ■ : Central (8 provinces) ■ : West (6 provinces, 1 city, 5 autonomous regions) ■ : E-commerce ■ : OEM, etc.

### Australia ~Business Portfolio Transition~

- Fastest shift toward electrification among markets where Rinnai Group operates
  - ⇒ We will continue driving business diversification through proactive M&A activities and introduction of new products

### Main products

Gas: Water heaters (tankless), fan heaters, fan-forced heaters Other: Solar hot-water systems

### Main products

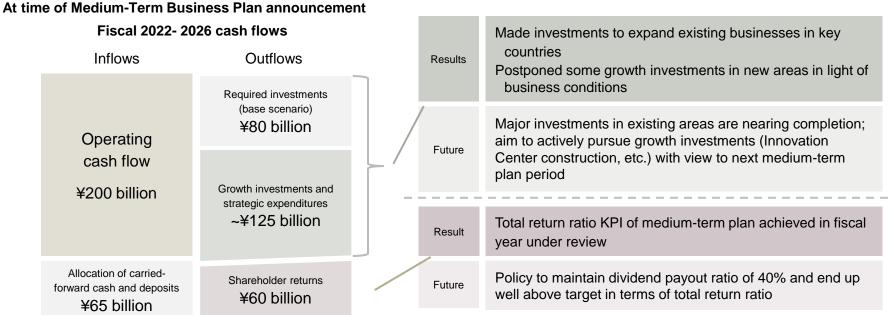

Gas: Water heaters (tankless and storage-type), fan heaters, fan-forced heaters, ducted air conditioning systems, fireplaces

Electric: Storage water heaters, heat pump water heaters, air conditioners

Other: Solar hot-water systems, after-sales services

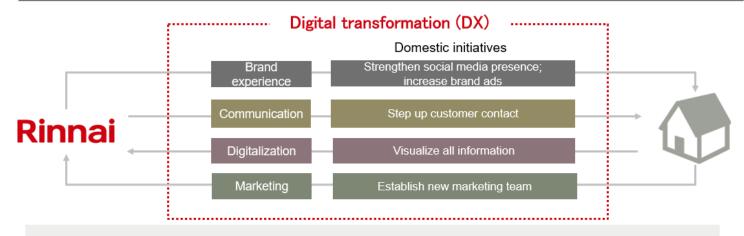

## Capital Policy ~Review of Cash Allocation and Future Outlook~

- Make investments to maintain and expand existing businesses; focus on investments to address changing energy mix
- Actual shareholder return surpassed Medium-term plan KPI (total return ratio 40%; 5-year average)

# **DX Initiatives** ~Consumer Communication~ (from Medium-Term Business Plan)

### **Revolution of Corporate Structure : Become More Consumer-Oriented**

We will establish a new marketing organization and build new lines of communication with consumers, both digitally and in the real world, within the framework of DX, by capturing people's essential needs for improved quality of life and linking them to our product planning and sales promotion activities.

We will also create a business model that continuously provides value to consumers throughout their lives through brand experiences that they can enjoy with peace of mind.

# **DX Initiatives** ~Consumer Communication~

- Advancing new initiatives to establish and strengthen connections with Rinnai-brand fans
- Physical event for fans

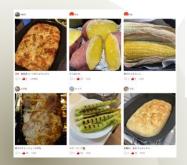

- ·Participants: 10 (300+ applicants)
- · Demonstration of recommended recipes Sharing usage techniques and living ideas

Community site established and operating

- · Established: May 2024
- ·Users interact with each other and ask questions to employees
- <Reference>

- · Established: September 2020 · Followers: 41,000 persons
- (O)
- Established: September 2020
- ·Followers: 17,000 persons

#### Online events for fans

# Upcoming event Online meeting with Development Manager

~ Topic: Built-in stoves ~ **Date and time** 

11:00–12:00 & 19:00–20:00, Tuesday, August 27, 2024 11:00–12:00 & 19:00–20:00, Thursday, August 29, 2024

- Participants: 8 persons (development staff: 3 persons)
- Introduction to dedicated development staff Roundtable discussion to exchange opinions with users

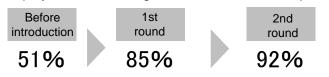

### **ESG Topics**

■ Restricted stock (RS) incentive for Employee Shareholding Association (2nd round) <Same size as 1st round (April 2023)>

Granted RS to expand benefits and improve shareholder's value

| Recipients                 | 3,521 persons    |  |
|----------------------------|------------------|--|
| Number of shares granted   | 60 shares/person |  |
| Restricted transfer period | Approx. 3 years  |  |
| Grant date                 | October 16, 2024 |  |

#### Employee Shareholding Association membership rate

<sup>\*</sup> Incentive: 15% of purchase price added at company expense

### ■ Reduction of strategic shareholdings

| Fiscal year                              | 2020   | 2021   | 2022   | 2023   | 2024   | 2025-2Q |
|--|--------|--------|--------|--------|--------|---------|
| Number of stocks held                    | 102    | 97     | 91     | 88     | 82     | 82      |
| Balance sheet amount (¥ millions))       | 15,775 | 16,340 | 14,833 | 17,036 | 20,394 | 19,045  |
| Ratio to net assets                      | 4.6%   | 4.4%   | 3.9%   | 4.2%   | 4.7%   | 4.2%    |
